

THE RIGHT TREE IN THE RIGHT PLACE

CAREFUL PLANNING WILL LEAD TO A HEALTHY URBAN FOREST!

A poor selection for this location

This tree is suitable for the site

WHAT IS “RIGHT TREE, RIGHT PLACE?”

This easy-to-remember tree-planting mantra, developed by the Arbor Day Foundation, encourages considerate thought for the future growth when planting new trees.

WHY IS THIS IMPORTANT?

When planting a tree, you must understand that all trees have various requirements. Considering these characteristics will ensure that your investment in a newly planted tree will be protected and maximized.

WHAT TO CONSIDER?

When selecting a new tree to be planted, you should consider mature height, canopy spread, growth rate, shape, soil requirements, along with many other things.

WHERE CAN I LEARN MORE?

Planting trees is a great gift to your community, but there's a lot to consider when selecting and planting a new tree.

For a comprehensive list of characteristics to consider when selecting a new tree for your landscape, please visit:

THE CITY OF
MANCHESTER
MISSOURI

YOUR LOCAL URBAN FOREST

Trees are one of the greatest assets a city can have. They play a major role in cleaning our air and water, reducing electricity bills by shading our buildings, and providing natural beauty. Just like any asset, trees require some basic maintenance and consideration.

Tree Advisory Board

Did you know Manchester has a Tree Advisory Board that meets regularly? Their goal is to develop and maintain the community's trees and forest in a strong, healthy condition for today and the future.

Municipal Tree Packet

The Manchester Tree Advisory Board has developed an information packet that can answer questions about your urban forest related needs.

**For more information on your city's
urban forest, please visit:**

www.manchestermo.gov/treeboard

*Have tree questions? Please contact the Tree Advisory Board at
treeboard@manchestermo.gov
or call 636-227-1385 (ext. 168)*

MISSOURI DEPARTMENT OF CONSERVATION TRIM GRANT

A portion of the funding for these informational brochures was made available through the Missouri Department of Conservation Tree Resource Improvement and Maintenance (TRIM) program. Thank you to the Missouri Department of Conservation for their continued support of our tree program!
